

Dissertation Process Questionnaire

Instructions

The purpose of the questionnaire is to ascertain doctoral students' thoughts about the dissertation process. Your honest responses will help provide a better understanding of doctoral students' experience with this process. In the context of this questionnaire, dissertation process means the entire process students experience to construct and defend the dissertation. This includes, for example, developing the research idea, developing and defending the prospectus, collecting and analyzing data, writing the dissertation, and defending the dissertation before of a committee.

The following 10 statements refer to the dissertation process that you will soon experience. There are no right or wrong answers, so please answer as accurately as possible. Use the scale below to respond to each statement. If you think the statement is very true of you, circle 7; if the statement is not at all true of you, circle 1. If the statement is more or less true of you, find the number between 1 and 7 that best describes you.

Please return completed questionnaires to the instructor when finished. Thank you.
